

VWS – driptnose bead

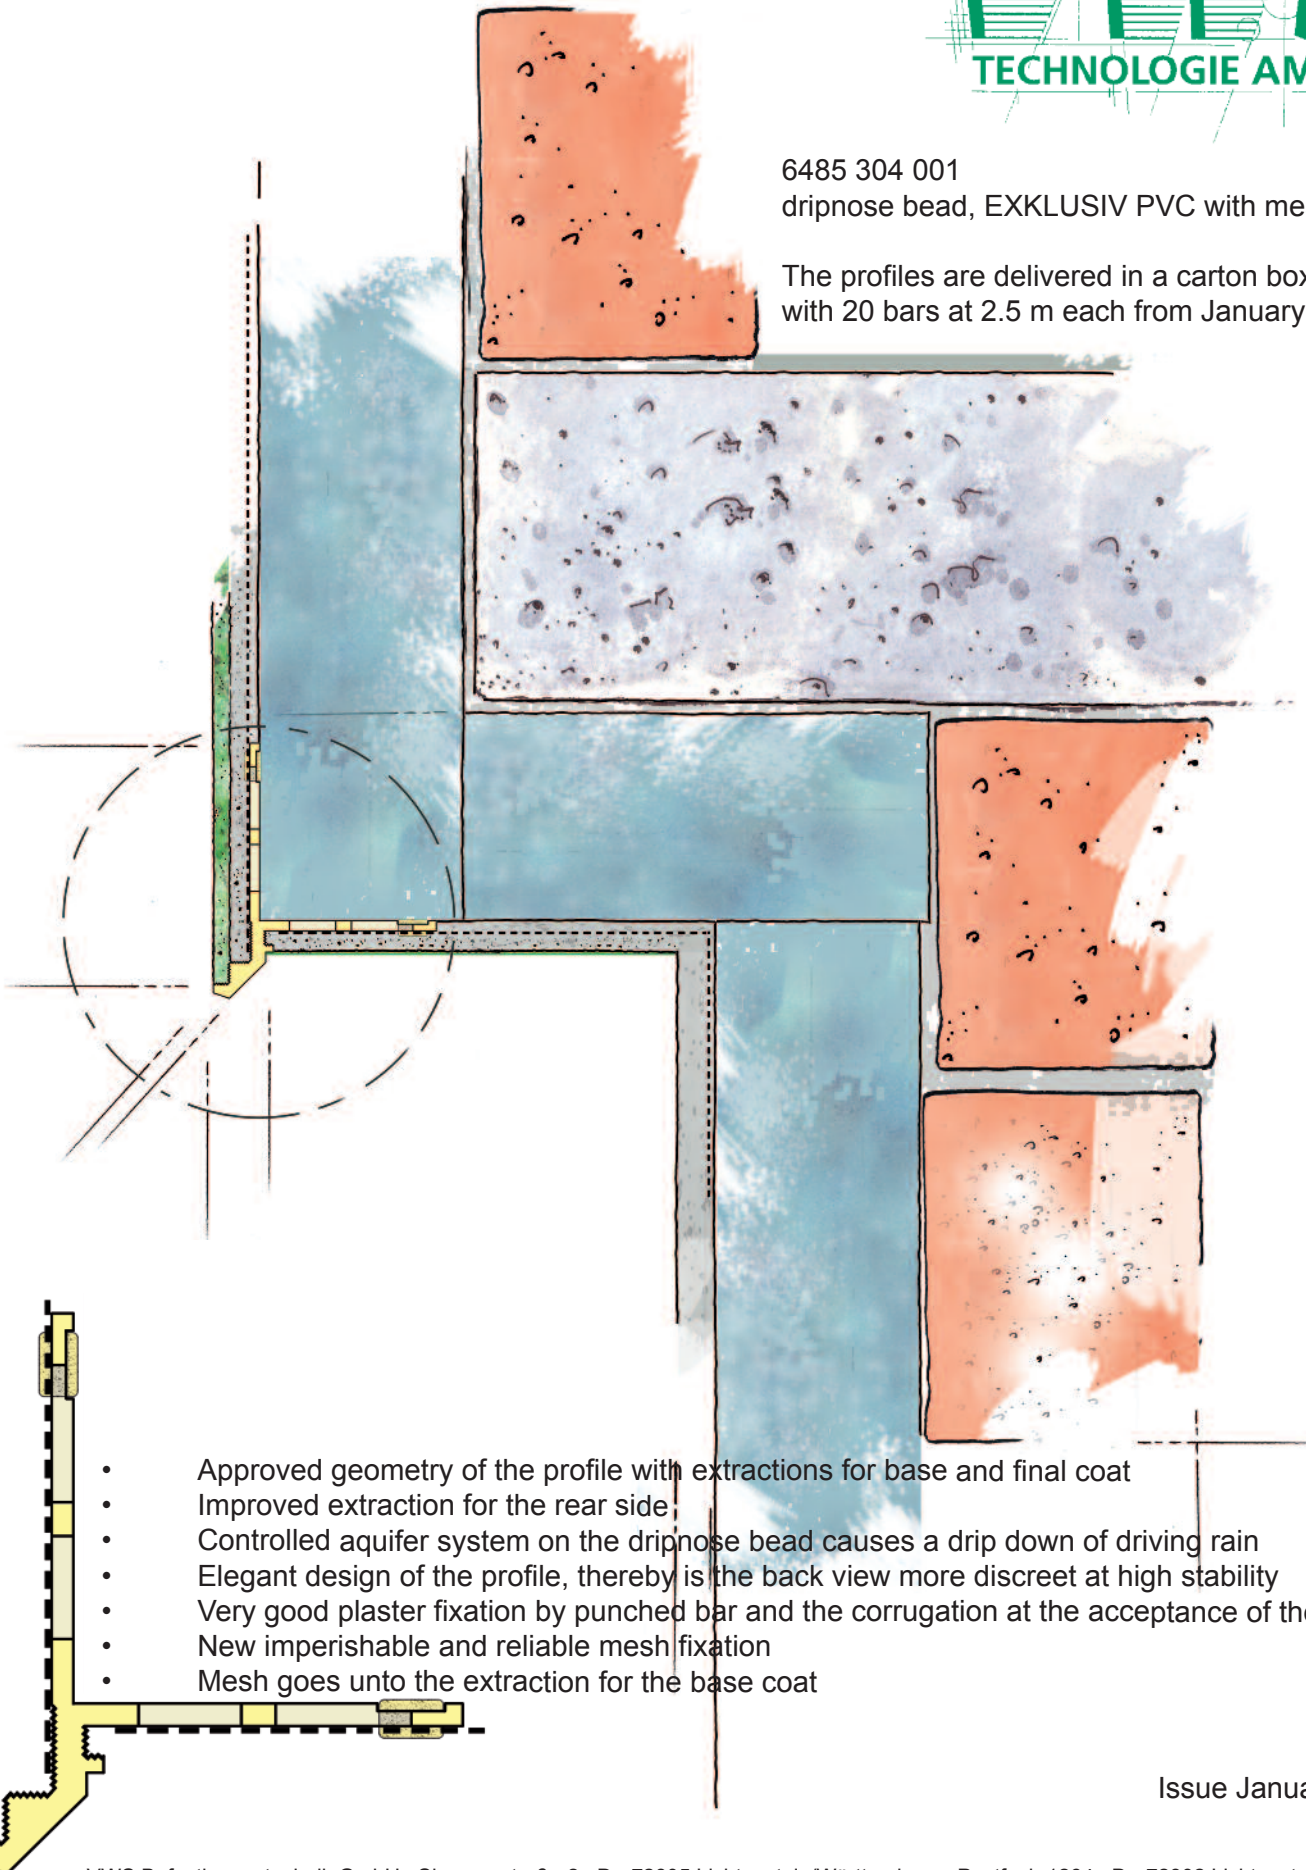

# EXKLUSIV

6485 304 001

driptnose bead, EXKLUSIV PVC with mesh

The profiles are delivered in a carton box with 20 bars at 2.5 m each from January 2011 on

- Approved geometry of the profile with extractions for base and final coat
- Improved extraction for the rear side
- Controlled aquifer system on the driptnose bead causes a drip down of driving rain
- Elegant design of the profile, thereby is the back view more discreet at high stability
- Very good plaster fixation by punched bar and the corrugation at the acceptance of the plaster
- New imperishable and reliable mesh fixation
- Mesh goes onto the extraction for the base coat

Issue January 2011
